What is this product?

Type

Irish UCITS Fund

Term

The Fund is established as a daily traded, open-ended investment company and does not have a stated maturity date. The Fund may be terminated only upon action by the Fund's Board of Directors. The Directors may terminate the Fund with 30 days' notice to Shareholders if the Fund ceases to be economically viable, or for any other reason that the Directors determine – in their absolute discretion – is in the best interests of Shareholders. The Directors are also entitled to terminate any Fund with the sanction of a special resolution of Shareholders.

Objectives

The Brookfield Global Renewables and Sustainable Infrastructure UCITS Fund (the "Fund") seeks total return through the growth of capital and current income. The Fund mainly invests in equities. The Fund invests primarily in securities of global renewables and sustainable infrastructure companies. For a more detailed explanation of global renewables and sustainable infrastructure, please refer to the Fund's Supplement. The Fund may invest in securities issued by U.S. and non-U.S. issuers, including companies in emerging markets around the world. In investment terms, emerging markets are regions of the world that are typically still developing their economies. The Fund may invest in derivatives. Derivatives may be used for investment purposes and for efficient portfolio management such as reducing risk, costs, or generating additional capital or income for the Fund. Any income the Fund generates for this Share Class will be reinvested to grow the value of your investment. You can buy and sell shares on most working days in Dublin. Exceptions are more fully described in the Prospectus. The Fund is actively managed, meaning the Investment Manager has discretion over the composition of the Fund's portfolio, subject to the Fund's stated investment objective and policy. Although the MSCI World Index is used by the Fund for performance comparison purposes only, the Investment Manager's investment decisions will not be influenced by the constituents of the MSCI World Index. For full investment objectives and policy details, please refer to the Prospectus.

Intended Retail Investor

Investment in the Fund may be suitable for investors with a medium to long term investment horizon.

The Fund does not provide its investors with any guarantee on performance, nor on monies invested in it. The overall Fund value may be considerably affected by: adverse market, economic, technological or regulatory conditions, perceptions regarding the industries in which the Fund invests and the circumstances and performance of particular companies whose securities the Fund holds. The Fund will be primarily invested in infrastructure securities, and therefore may be more volatile than a fund which is more broadly diversified. Certain derivatives may result in gains or losses that are greater than the original amount invested. Emerging markets may face more political, economic or structural challenges than developed countries. Changes in exchange rates may cause the value of investments to decrease or increase. Emerging markets or less developed countries may face more political, economic or structural challenges than developed countries, putting your money at greater risk. An extended discussion of the risks associated with an investment in the Fund is set out in the Prospectus.

The Fund's Depositary is CACEIS Investor Services Bank S.A. Dublin Branch ("the Depositary"). Under the current tax legislation of Ireland, the Fund is not subject to Irish tax on its income or capital gains. No Irish tax will arise for a Shareholder who is neither Irish Resident nor Ordinary Resident in Ireland. Investors should seek professional advice as to the personal tax impact of an investment in the Fund under the laws of the jurisdictions in which they may be subject to tax. The Manager may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus. You are entitled to switch from one share class to another, either in this Fund or in another sub-fund of Brookfield Investment Funds (UCITS) plc provided that you meet all criteria. Further details on switching are set out in the Prospectus. The Fund and Brookfield Investment Funds (UCITS) plc are authorised in Ireland and regulated by the Central Bank. Details of the up-to-date remuneration policy of the Manager are available on www.kbassociates.ie and a paper copy will be made available free of charge upon request. Index performance is shown for illustrative purposes only and does not predict or depict the performance of the Fund.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes that you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of the PRIIPs manufacturer to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment in the benchmark between December 2021 and March 2023.

The moderate scenario occurred for an investment in the benchmark between December 2014 and December 2019.

The favourable scenario occurred for an investment in the benchmark between October 2016 and October 2021.

Recommended holding period: 5 years.

Example Investment: GBP 10,000.

Scenarios		If you exit after 1 year	If you exit after 5 years

What happens if Brookfield Public Securities Group LLC is unable to pay out?

Losses are not covered by an investor compensation or guarantee scheme. There is a potential default risk if the assets of the Fund held with the Depositary are lost. However, such default risk is limited due to the relevant rules that govern the operation of the Fund, which require in relevant part the segregation of assets between those of the Depositary and the Fund. The Depositary is liable to the Fund or to the investors of the Fund for the loss by the Depositary or one of its delegates of a financial instrument held in custody unless the Depositary is able to prove that the loss has arisen as a result of an external event beyond its reasonable control. For all other losses, the Depositary is liable in case of its negligent or intentional failure to properly fulfil its obligations pursuant to applicable rules and regulations.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year, you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- GBP 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	937 GBP	2,383 GBP
Annual cost impact (*)	9.4%	3.4% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 10.4% before costs and 7.0% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
